My Book Pro

Professional RAID Storage

Product Features

Performance driven

Realize extreme performance with the combination of Thunderbolt 2, WD Black drives and hardware RAID:

- **Thunderbolt™ 2** – Supports up to 20 Gb/s data-transfer rate; daisy chain up to six additional Thunderbolt devices with no impact on throughput speed.
- **WD Black™ internal with 7200 RPM** – A preferred drive of creative professionals, experts and users with high-performance requirements.
- **Hardware RAID** – Because RAID processing is handled within the drive, data bottlenecks are reduced and throughput is improved.

Advanced connectivity

- Connect up to six devices in a Thunderbolt daisy chain for optimized single-cable workflow with 4K monitors, additional storage devices and peripherals.
- USB 3.0 compatibility for use with non-Thunderbolt systems.
